TETHERSEND PRODUCTIONS PRESENTS

SAUCY JACK

Saucy Jack is an examination of evil from the point of view of Jack the Ripper, a man noted for the evil of his deeds. The play will take you back to the autumn of 1888 for a look at the five canonical murders attributed to him and how they presage the terrible events that have filled human history in the last century. Through the play Jack will demonstrate that he has been misunderstood for all

these years and leave the final decision in the hands of the audience. The play has mature themes and some language but Jack's wit gives a balance as he looks at genocide, war and serial killers, topics we ignore in our modern world view. Let Jack the Ripper put a dagger into your preconceptions.

From Hell he will take you there and hopefully return you safely to your mind
